

Dimas
SOLAR THERMAL INDUSTRY

DIMAS Company suggests the integrated systems for flat roof (terrace), which combine excellent quality, high efficiency, easy installation and are the best solution for energy saving.

COMPLETE SYSTEMS

Manufactured with high quality materials, controlled by quality assurance system **ISO 9001:2008**, and carrying all certificates and test reports that proofs their quality.

www.dimas-solar.gr

Suitable for households, achieve high production of domestic hot water in less time, saving energy throughout the year, even in areas with little sunshine because of their selective collector surface.

The installation can be done easy and fast with the innovative mounting structure, made of galvanized steel, without any welding, and the solar collector can be installed and levelled easy with the internal movable parts.

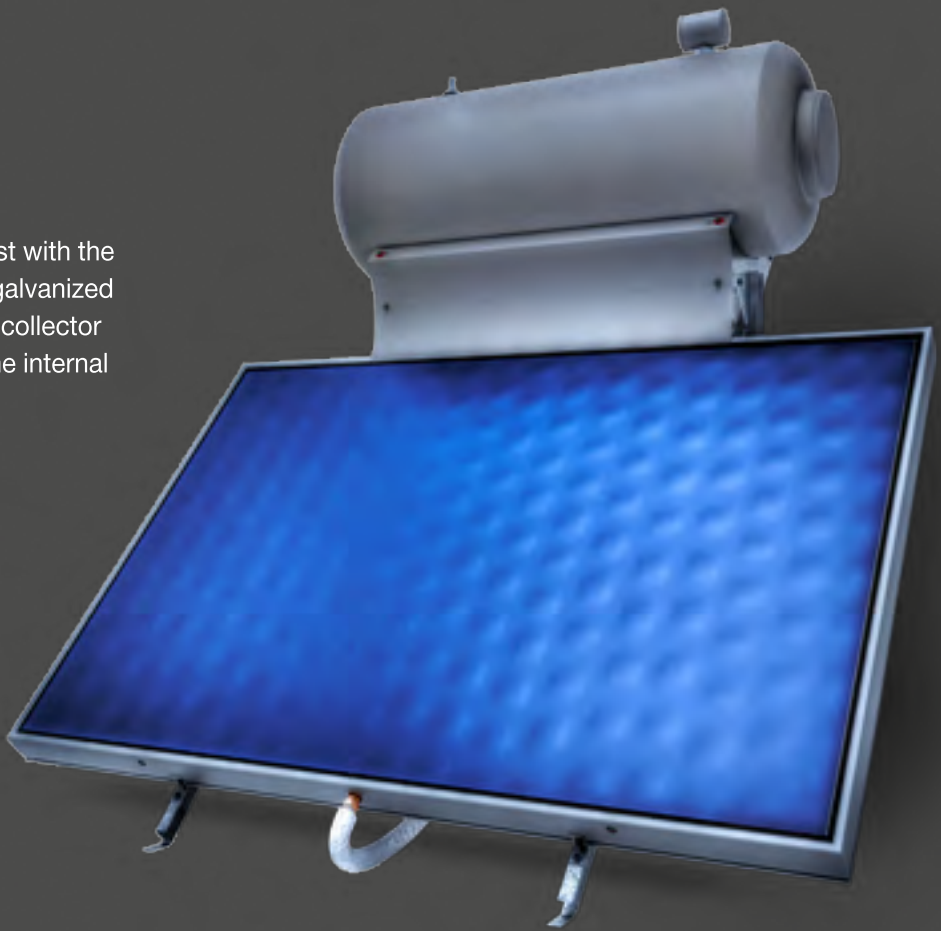

The range includes 3 types available

120 Litre - dimensions 1.75m

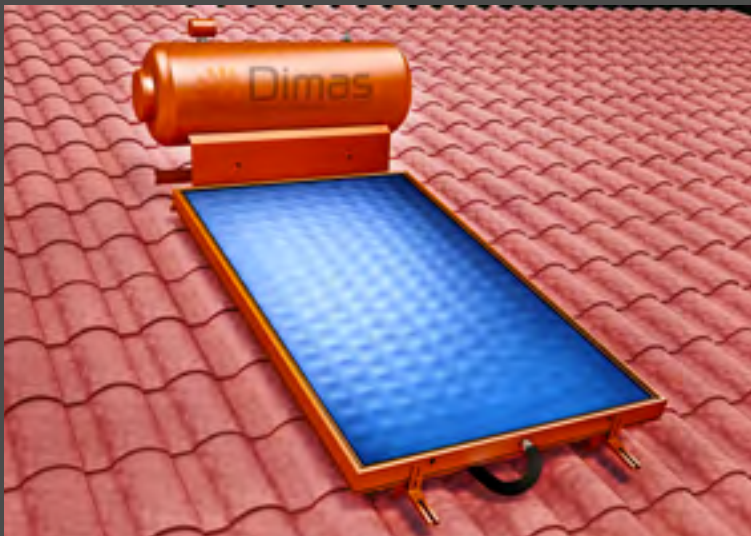

160 Litre - dimensions 2.30m

200 Litre - dimensions 2.75m

combined with selective surface collectors which are the most beneficial choices on low cost – high efficiency solar systems.
